

POLYMERS

Specification Sheet

Particulars	Description
Product	Copolymer Sodium Acrylate / Sodium Maleate Flosperse 10030 CM - By SNF India
Specification	Appearance – Clear Liquid Ionic Character – Anionic Charge Density – Very High Brookfield Viscosity (cps) – 2000 - 5000 pH of Solution – 6.0 – 8.0 % NVS – 38 - 42 Storage Temperature (Degrees C) – 0.0 – 35.0 Shelf Life (months)* - 6.0 (*when stored inside a building at a stable temperature between 5 and 30 degrees C)
Specially For	Application in Detergents

Specification Sheet

Particulars	Description
Product	Sodium Poly Acrylate Flosperse 3000 A - By SNF India
Specification	<p>Appearance – Clear Colourless to Pale Yellow Liquid</p> <p>Ionic Character – Anionic</p> <p>Charge Density – High</p> <p>Brookfield Viscosity (cps) – 200 - 600</p> <p>pH of Solution – 2.0 – 4.0</p> <p>% NVS – 49.50 – 53.50</p> <p>Storage Temperature (Degrees C) – 0.0 – 35.0</p> <p>Shelf Life (months)* - 12.0</p> <p>(*when stored inside a building at a stable temperature between 5 and 30 degrees C)</p>
Specially For	Application in Detergents

Specification Sheet

Particulars	Description
Product	Sodium Poly Acrylate Flosperse 3000 - By SNF India
Specification	<p>Appearance – Clear Colourless to Pale Yellow Liquid</p> <p>Ionic Character – Anionic</p> <p>Charge Density – Very High</p> <p>Brookfield Viscosity (cps) – 100 - 600</p> <p>pH of Solution – 7.0 – 7.5</p> <p>% NVS – 42 – 46</p> <p>Specific Gravity – 1.3 (Approx)</p> <p>Freezing Point (Degrees C) – 0.0</p> <p>Storage Temperature (Degrees C) – 0.0 – 35.0</p> <p>Shelf Life (months)* - 12.0</p> <p>(*when stored between 5 and 30 degrees C)</p>
Specially For	Application in Detergents
